

Análisis bibliográfico de los artículos con autoría española en materiales compuestos.
3^{er} y 4^o trimestre de 2021

Prefacio

En su afán por divulgar el conocimiento en materiales compuestos generado en España y posibilitar el establecimiento de sinergias entre los distintos centros, y entre ellos y el tejido productivo, AEMAC hace un seguimiento de los artículos que se generan en revistas científicas y los condensa en estos informes periódicos.

El siguiente listado NO contiene todos los que se habrán generado. Ver los criterios de búsqueda al final de este documento. Este listado se ha generado a 11 de Enero de 2022.

El listado de artículos sigue a los publicados en el [1T 2018](#), [2T y 3T 2018](#), [4T 2018](#), [1T y 2T 2019](#), [3T 2019](#), [4T 2019](#), [1T y 2T 2020](#), [3T y 4T 2020](#), [1T 2021](#) y [2T 2021](#).

Listado de artículos aparecidos el 3^{er} y 4^o trimestre de 2021

Adriana, C. F. I., Jaime, F. G., Paula, V. L., Antonio, F., & Marco, P. (2021). Evaluation through a finite element simulation of the performance of FRP anchors for externally bonded reinforcements. *Composite Structures*, 267. doi:10.1016/j.compstruct.2021.113919

Aenlle-Lopez, M., Pelayo, F., Calvente, M. M., & Lamela-Rey, M. J. (2021). Buckling of laminated glass plates using the effective thickness concept. *Journal of Sandwich Structures & Materials*, 23(7), 3303-3335. doi:10.1177/1099636220927003

Arbelaz, A., Fernandez, G., & Orue, A. (2021). The effect of montmorillonite modification and the use of coupling agent on mechanical properties of polypropylene-clay nanocomposites. *Polymers & Polymer Composites*, 29(6), 660-671. doi:10.1177/0967391120930613

Artigas-Arnaldas, J., Munoz, B. K., Sanchez, M., de Prado, J., Utrilla, M. V., & Urena, A. Surface Modifications of Carbon Fiber Electrodes for Structural Supercapacitors. *Applied Composite Materials*. doi:10.1007/s10443-021-09998-5

Bado, M. F., Casas, J. R., Dey, A., Berrocal, C. G., Kaklauskas, G., Fernandez, I., & Rempling, R. (2021). Characterization of concrete shrinkage induced strains in internally-restrained RC structures by distributed optical fiber sensing. *Cement & Concrete Composites*, 120. doi:10.1016/j.cemconcomp.2021.104058

Bahrami, M., Enciso, B., Gaifami, C. M., Abenojar, J., & Martinez, M. A. (2021). Characterization of hybrid biocomposite Poly-Butyl-Succinate/Carbon fibers/Flax fibers. *Composites Part B-Engineering*, 221. doi:10.1016/j.compositesb.2021.109033

Brito-Pereira, R., Tubio, C. R., Costa, P., & Lanceros-Mendez, S. (2021). Multifunctional wax based conductive and piezoresistive nanocomposites for sensing applications. *Composites Science and Technology*, 213. doi:10.1016/j.compscitech.2021.108892

Calles, A. F., Carou, D., & Ferreira, R. T. L. Experimental Investigation on the Effect of Carbon Fiber Reinforcements in the Mechanical Resistance of 3D Printed Specimens. *Applied Composite Materials*. doi:10.1007/s10443-021-09996-7

Caneda-Martinez, L., Kunther, W., Medina, C., de Rojas, M. I. S., & Frias, M. (2021). Exploring sulphate resistance of coal mining waste blended cements through experiments and thermodynamic modelling. *Cement & Concrete Composites*, 121. doi:10.1016/j.cemconcomp.2021.104086

Cantero-Chinchilla, S., Malik, M. K., Chronopoulos, D., & Chiachio, J. (2021). Bayesian damage localization and identification based on a transient wave propagation model for composite beam structures. *Composite Structures*, 267. doi:10.1016/j.compstruct.2021.113849

Carmona-Quiroga, P. M., Mota-Heredia, C., Torres-Carrasco, M., Fernandez, J. F., & Blanco-Varela, M. T. (2021). Effect of BaCO₃ reactivity and mixing procedure on sulfate-resistant cement performance. *Cement & Concrete Composites*, 120. doi:10.1016/j.cemconcomp.2021.104038

Castano-Alvarez, R., Calderon-Uriszar-Aldaca, I., & Marcos, I. Applicability of existing models for the strength development of 3D-printed thixotropic concretes during hardening. *Mechanics of Advanced Materials and Structures*. doi:10.1080/15376494.2021.2018072

Castro, J., Sket, F., Helfen, L., & Gonzalez, C. (2021). In situ local imaging and analysis of impregnation during liquid moulding of composite materials using synchrotron radiation computed laminography. *Composites Science and Technology*, 215. doi:10.1016/j.compscitech.2021.108999

Costa, C. M., Reizabal, A., Serra, R. S. I., Balado, A. A., Perez-Alvarez, L., Ribelles, J. L. G., . . . Lanceros-Mendez, S. (2021). Broadband dielectric response of silk Fibroin/BaTiO₃ composites: Influence of nanoparticle size and concentration. *Composites Science and Technology*, 213. doi:10.1016/j.compscitech.2021.108927

Cruz-Gonzalez, O. L., Ramirez-Torres, A., Rodriguez-Ramos, R., Penta, R., Bravo-Castillero, J., Guinovart-Diaz, R., . . . Lebon, F. (2021). A hierarchical asymptotic homogenization approach for viscoelastic composites. *Mechanics of Advanced Materials and Structures*, 28(21), 2190-2201. doi:10.1080/15376494.2020.1722872

Danzi, F., Tavares, R. P., Xavier, J., Fanteria, D., & Camanho, P. P. (2021). Effects of hybridization and ply thickness on the strength and toughness of composite laminates. *Journal of Composite Materials*, 55(30), 4601-4616. doi:10.1177/00219983211041762

Criterios de búsqueda

Los artículos incluidos en el presente listado son los que aparecen en la base de datos “*Science Citation Index Expanded (SCI-EXPANDED) from Web of Knowledge Core Collection*” de Clarivate Analytics, con las restricciones: Subject = “Materials Science, Composites” y Country = “Spain”. Por lo tanto, por ejemplo, no aparecerán artículos de autores españoles afiliados a centros extranjeros ni artículos de composites publicados en revistas indexadas en otras materias (*subjects*).

Contribución a la ampliación de los criterios de búsqueda

Para identificar los artículos sobre materiales compuestos con autoría de centros de investigación españoles publicados en revistas indexadas en otras materias (*subjects*), los centros pueden enviar a AEMAC (administración@aemac.org) los criterios de “búsqueda avanzada” a utilizar en la base de datos antes citada que permitan identificar sin ambigüedad las publicaciones del centro. No se atenderá a la recepción de artículos individuales ni a criterios de “búsqueda avanzada” que no estén en el formato de la base de datos (el formato aceptable será el resultado de un “Saved Search” en la ventana de búsquedas avanzadas de la base de datos). El centro debe haber comprobado la fiabilidad del criterio de búsqueda (no debe generar ni artículos de otros campos ni de otros autores).

Descargo de responsabilidad

La información contenida en este listado está destinada únicamente a fines informativos con objeto de fomentar su difusión en el sector español y se ha recabado de bases de datos de terceros. Por la presente nota de descargo de responsabilidad, AEMAC declina cualquier responsabilidad por omisión o inexactitud de la información recogida en este documento.
